24 Product overview
Today we know better. After a hesitant start, the Dutch carpet industry descended en masse on the phenomenon of cotton carpets. Or rather, the phenomenon 3801.

By the end of the seventies, we counted 58 copies on the market. But Van Besouw had long since moved on to the next stage. The cotton velvet 3802 followed. Competitors never succeeded in copying this successful carpet.

You can say that again. Van Besouw’s unusual choice of fibres has stirred up the world of carpets more than once. The arrival of the first cotton carpet, the 3801, was nothing short of a revolution. Not immediately appreciated, of course.

Cotton was considered inferior: you bought a cheap cotton one at the market. It is 1969 and people had yet to learn to appreciate natural fibres. Today we know better. After a hesitant start, the Dutch carpet industry descended en masse on the phenomenon of cotton carpets. Or rather, the phenomenon 3801.

By the end of the seventies, we counted 58 copies on the market. But Van Besouw had long since moved on to the next stage. The cotton velvet 3802 followed. Competitors never succeeded in copying this successful carpet.
Excellence since 1839

1839, Goirle
Van Besouw was founded in Holland in 1839 with home weavers.

1885, Goirle
Start of the first factory with production of linen and bags.

1904, Goirle
Van Besouw started with Holtap (Holland Carpets). Carpets in 200cm width and rugs.

1949, Goirle
Van Besouw get the wilton weaving machines. Originally Van Besouw wall-to-wall carpets.

1966, Goirle
Beno Premtsela (Industrial Designer) was invited. To design the next step of Van Besouw.

1967, Goirle
The “turn around” in Van Besouw’s history. Introduction of the cotton carpets made on raschel knitting machines.

1967, Goirle
Start of Van Besouw as a brandname. Slogan: unbutton and just pretend carpet does not exist (it’s not just a carpet ... it’s a Van Besouw.

1967, Goirle
Winner of the famous award (at that time) for the wooldmark collection.

1969, Goirle
Van Besouw get the wilton weaving machines. Originally Van Besouw wall-to-wall carpets.

1969, Goirle
Benno Premtsela (Industrial Designer) was invited. To design the next step of Van Besouw.

1970, Goirle
The “turn around” in Van Besouw’s history. Introduction of the cotton carpets made on raschel knitting machines.

2010, Genemuiden
Van Besouw was taken over, into the current organisation.
- Cotton is the tradition of Van Besouw and famous for this all over the world.
- Van Besouw well known for its special colors and innovative products.
- Van Besouw is a passion, emotion, and you need to believe in it.

2012, Genemuiden
Introduction of the Van Besouw PREM. Collections. A polyamide contract collection, based Van Besouw’s key values.

2013, Genemuiden
Re-introduction of the cotton collection. With a new colour range and an extra quality: 3809.

2017, Genemuiden

inspiration
Van Besouw has been around for a long time now; the company dates from 1839. In more than a century and a half, the company grew from weaving jute mailbags into being a leading supplier of contemporary carpets. How things can change!

Product innovation came - unexpected - during World War II. By then, Van Besouw had started producing rugs. The usual raw materials had become scarce. Then the social innovator’s grandson, also called Jan, built a mill for spinning paper. Used paper could be spun into yarn, which was woven into rugs. Today, using paper yarns is considered very innovative. Take note! The tone for Van Besouw’s futures has been set. The key innovation comes in 1967, by which time Van Besouw has become a carpet factory. A move away from the trodden path: Van Besouw starts making carpets that are not made anywhere else.

Led by the industrial designer Benno Premsela, a new and innovative collection is produced, with cotton loop carpet 3801 as an icon. The 3801 is often copied later but never equalled. ‘Creating rather than imitating’ becomes the motto. Over forty years later, Van Besouw still is a renowned innovator. Craftsmanship is combined with modern technology. Clever inventions help create high-tech aesthetics. Van Besouw is ready for the future.

Creating above imitating
’Creating rather than imitating’ becomes the motto. Over forty years later, Van Besouw still is a renowned innovator. Craftsmanship is combined with modern technology.
Led by the industrial designer Benno Premsela, a new and innovative collection is produced, with cotton loop carpet 3801 as an icon. The 3801 is often copied later but never equalled.

Features cotton
- very resistant
- good to colour
- skin friendly
- moisture absorbing
- matte colour
- nature product, nature feeling

Raschel knitting
The piles are falling down in all directions. This is impossible in tufted carpets. Besides the high quality level of this production method, The “writing character” is one of the most beautiful things of this kind of carpets.
Healthy Carpets. This sound probably it bit strange, but it’s reality. Carpets are good for health (working) space.

Fine dust
Everywhere is fine dust. If you can reduce the amount of this dust, your environment is feeling more comfortable, more healthy.

A carpet is giving you a lot of benefits, compared to hard floors. By hard floors, the fine dust is swirling through the space. But carpets are keeping the dust into the piles. Until the space is vacuumed. Of course you have to vacuum the carpet, frequently.

Woven last longer
Different carpets in the contract collection are flatwoven. One of the most durable types of production. The piles are treated so strong to each other, which means your carpet last longer.
Also in highly used areas, the carpet remains of it is.
Van Besouw loves textiles. Even more we love special carpets, creative color palettes and beautiful finishes.

Every space the right character
The special collection is a big chance, to give very space the right character.
Ideas enough. We think in materials, textures and colors. As soon as interesting materials are found, we look at the possible applications; in which production way can we make this. A moodboard follows. Thereafter a color proposal. And in the meantime, of course, the necessary (production) tests.

specials
flavour of flooring textiles

Trending:
volume rugs

The soft qualities in the Van Besouw program are extremely suitable for volume rugs (folded edges).
The pile is made of 100% Polyamide Silk Look yarn. Due to a high and full pile deck, this qualities has a voluminous and luxurious appearance.
Nature is the fountain of our inspiration. Impressive structures from the natural world are transformed into artwork in carpet tiles. Van Besouw a creative union of nature and innovative flooring!

ECONYL® yarn; 100% regenerated

The ECONYL® fiber made from pre- and post-consumer Nylon 6 waste, such as fishing nets and other material. ECONYL® Carpet fibers are made for architects, builders and designers looking for synthetic floor covering that aim to protect the future of our earth. They are included on the list of materials eligible for LEED® points (Leadership in Energy and Environmental Design) as part of the definition of worldwide standards for eco-friendly buildings. For more information, please visit www.econyl.com.

Vital Spaces

The indoor spaces need to be healthy, because you are spending most of your time there. Van Besouw Carpet Tiles are your important partner as airfilters. Dust particles will be captured and retained until vacuuming during daily maintenance.
Wondering wool. That’s the combination of Van Besouw and the wool fibre. Woven and raschel knitted. Thick luxurious or strong flat contract carpet. You can find it all in Van Besouw’s wool collection.

Wondering wool by wealth and diversity
- romantic vs. architectonic
- traditional vs. innovative
- artisan vs. industrial
- soft vs. hard
- warm vs. cool
- robust vs. refined
- luxury vs. simplicity
- elegant vs. sturdy

Named figures
Van Besouw gives never names to the carpets. A bit quirky, but with a reason: Names are associative.

But the numbers are not chosen randomly. For example, the first figure is for the material, the second for the way of production. The last two figures are the serial number.
**FACTS**

- Type of manufacture: woven
- Pile material: 100% New Zealand wool
- Back: bio jute
- Total thickness: 9.7 mm
- Pile weight: 1825 g/m²
- Width: 400 cm

**SYMBOLS**

- [Image of symbols]

**BENEFITS**

- The special looping method of the luxury yarn creates the characteristic knotted nap.
- New Zealand wool
  - Highest quality wool
  - Soft, luxurious fibre
  - Rich, deep colours
- Wide range of applications (see characteristics)
- Highly suitable as a custom area rug
  - Rugs are supplied with a standard comfortable extra anti-slip backing.
- Easily workable; longitudinal seams can be laid invisibly. Download the installation recommendations for more information.
- Available in custom colours from 480 m²

**PRODUCTS**

The cotton loop has long been a well-known Van Besouw phenomenon. The 1803 is the woolen derivative of that. The high pile weight with the characteristic Van Besouw loop creates a super-de-luxe carpet.

- 100% wool
- Highest quality wool
- Soft, luxurious fibre
- Rich, deep colours
- Wide range of applications (see characteristics)

- Highly suitable as a custom area rug
- Rugs are supplied with a standard comfortable extra anti-slip backing

- Easily workable; longitudinal and crosswise seams can be laid invisibly. Download the installation recommendations for more information

- Available in custom colours from 200 m²

**FACTS**

- Type of manufacture: raschel knitted
- Pile material: 100% wool
- Back: jute
- Total thickness: 11,2 mm
- Pile weight: 1400 g/m²
- Width: 400 cm

**SYMBOLS**

**BENEFITS**
1805

**FACTS**

- Type of manufacture: raschel knitted
- Pile material: 100% wool
- Back: non-woven
- Total thickness: 10 mm
- Pile weight: 1525 g/m²
- Width: 400 cm

**SYMBOLS**

**BENEFITS**

- The best of all worlds. It is, in fact, no twist or velour, but a combination of all. Because the carpet is knitted the piles are falling in all directions.
- A tip to see this effect well please ask for a bigger sample.
- 100% wool
- Highest quality wool
- Soft, luxurious fibre
- Rich, deep colours

- Available in custom colours from 400 m²
FACTS
- Type of manufacture: raschel knitted
- Pile material: 100% cotton
- Back: cotton
- Total thickness: 11.7 mm
- Pile weight: 2700 g/m²
- Width: 400 cm

SYMBOLS

BENEFITS
- Cotton is a very strong fibre and therefore perfectly suitable for intensively used spaces.
- Knitting with cotton, that is what made Van Besouw famous.
- Note its fluid character through the combination of the fibre and knitting technique. The longer the carpet is used the more beautiful it becomes.
- Cotton
  > very strong fibre
  > long lifespan
- Wide range of applications (see characteristics).
- Highly suitable as a custom area rug.
  > Rugs are supplied with a standard comfortable extra anti-slip backing.
- Available in custom colours from 400 m².
FACTS

- Type of manufacture: raschel knitted
- Pile material: 100% cotton
- Back: non woven
- Total thickness: 11.6 mm
- Pile weight: 2200 g/m²
- Width: 400 cm

SYMBOLS

BENEFITS

- Cotton is a very strong fibre and therefore perfectly suitable for intensively used spaces
- The tricolour pile works as a solid colour, whereby the carpet perfectly complements the other colours in an interior
- Knitting with cotton: that is what made Van Besouw famous
- Note its fluid character through the combination of the fibre and knitting technique. The longer the carpet is used, the more beautiful it becomes
- Cotton > very strong fibre > long lifespan > matt appearance
- Highly suitable as a custom area rug
- Rugs are supplied with a standard comfortable extra anti-slip backing
- Available in custom colours from 400 m²
**FACTS**
- Type of manufacture: woven
- Pile material: 50% wool / 50% goat’s hair
- Back: bio jute
- Total thickness: 7.1 mm
- Pile weight: 1425 g/m²
- Width: 400 cm

**SYMBOLS**

**BENEFITS**
- An exceptionally strong combination: wool with goats’ hair. And above all, the goats’ hair gives that extra dimension to the look and feel of this carpet.
- The production method says it all: flat weave. A tightly woven carpet making it suitable for a wide range of applications.
- Combination of yarns:
  - Wool is natural
  - Matt appearance
  - Goats’ hair is strong and reinforces the natural look
  - Long lifespan
  - Wide range of applications (see characteristics)
- Highly suitable as a custom area rug
- Rugs are supplied with a standard comfortable extra anti-slip backing
- Available in custom colours from 1060 m²
4404

**FACTS**
- Type of manufacture: woven
- Pile material: 80% wool / 20% cashmerehair
- Back: jute
- Total thickness: 9.3 mm
- Pile weight: 1350 g/m²
- Width: 400 cm

**SYMBOLS**

**BENEFITS**
- The fibre used is 100% natural: 0.0% dye is used to create the colour; it comes straight from the sheep and goat
- Characteristic diagonal structure: on the roll it runs from bottom left to top right
- Perfect combination of yarns: soft and luxurious
  - mix of yarns
    - luxurious fibre
    - matt appearance
    - long lifespan
- Highly suitable as a custom area rug
  - rugs are supplied with a standard comfortable extra anti-slip backing
FACTS

- Type of manufacture: wilton woven
- Pile material: 80% wool / 20% polyamide
- Back: latex
- Total thickness: 6.5 mm
- Pile weight: 1210 g/m²
- Width: 390 cm

SYMBOLS

BENEFITS

- the mixture of wool and polyamide yarns is a basis offering many advantages. In particular the matt appearance and luxury of wool, combined with the strength of polyamide
- wilton woven products rarely need backing. This makes them highly flexible products that are easy to install
- it can be easily combined with 7402. The basis is exactly the same
- 80% wool / 20% polyamide
  - strong combination
  - matt appearance
  - long lifespan
  - wide range of applications (see characteristics)
- Highly suitable as a custom area rug
  - rugs are supplied with a standard comfortable extra anti-slip backing
- available in custom colours from 400 m²

**FACTS**

- Type of manufacture: Tufted
- Pile material: Econyl Polyamide 6
- Back: bitumen
- Pile weight: 775 g/m²
- Dimensions: 250x100 cm
- Packaging: 2.5 m² per box
26010

**BENEFITS**

- Durable and colour resistant yarn dyed polyamide yarn (solution dyed)
- Large format tiles of 100x100 cm – efficient and fewer seams
- A very important advantage of the 26010 carpet tiles is acoustic backing. The figures $\Delta L_w = 27$ dB, $\Delta L_{lin} = 14$ dB

Combination of Van Besouw carpet tiles (www.besouw.nl) and Therdex Loose Lay (www.therdex.nl) give you unlimited possibilities to design with hard and soft floor covering.

- Perfectly to combine with the Therdex Loose Lay Series (www.therdex.nl)

**FACTS**

- Type of manufacture: Tufted
- Pile material: Solution Dyed Polyamide 6
- Back: acoustic felt
- Pile weight: 520 g/m²
- Dimensions: 100x100 cm
- Packaging: per piece

**SYMBOLS**

- Fire resistant
- Anti-slip
- Washable
- Pet-friendly
